to our minds the following forcible argument Gross Blackwood's Edinburgh Magazing.

Every body knows that the States of the Union embrace a territory most of it of the highest fertility, equal to the surface of all Europe, including Russia on this side of the Ural incont. France, and thirty two times that of the British' Islands. In this immense territory there is a population of twelve millions of men, almost all an honorable discharge. active, industrious and energetic, doubling every thirty years, and capable if suclained at the same rate of increase, of producing in two centuries, two hundred millions of human beings, in comfort and happiness. What then is wanting to sustain the fortunes of a State in such unparalelled encountances of abundance? No thing but CAPITAL. This cowever is indispensible, and it is obviously impossible even in the most industrious, saving and active population in the world, that the existing wealth cenbe proportioned either to the boundless watent for you! of the waste lands capable of tillage, or the constantly incremning wants of a growing and indefutigable people. It is in such a state that the OVD Avorings a super success their ly felt, and that a paper circulation, based on utility of BANKs and paper credit is most strongment in the progress of social improvement. Banks are the great instrument by which in-

legrity and talent supply the went of capital; y which prudence and industry, setting out on the banks of paper credit, attain at length to the solid advantage of substantial capital. Such a system quadruples at once the active capital of | the country, by producing a paper capital based on credit, which as long as that credit remains unshaken, answers all the purposes of encouraging industry just as well as the metalic treasures of Mexico and Peru. It prevents a large portion of the national wealth from being absorbed in the unprofitable and unproductive form of a metalic currency, and provides for the necessary circulation at a fifth part of the cost. Old States in which capital is redundant, and all home employment nearly filled up may dispense with a paper currency, just as the finished schollar may dimard the rudiments, or the accomplished equestrian forget the lessons of the manege; but till that last stage has arrived, it is the greatest act of national mannity to destroy public safety requires, the invaluable ally of paper circulation. It has quadrupled in the last half century the wealth of Scotland, and multiplied ten fold that of America. But for the powerful influences given by the advances of bankers, and the enlarged capital which they put in motion, the industry of the United States, instead of having lung ago crossed the Alleghany mountains and given birth to four millions of men in the Valley of the Mississippi, would have been slowly advancing along the shores of the Atlantic, and not yet have pierced the profound solitudes of the Ohio, or of the Missou

The Camomile Preparation by Dr Wm Evans is underiably entitled to this enviable distinction, for | winiat no medical authority in existence condemns it, every medical practitioner that is acquimited with it, freely acknowledges at pre-eminent virtues and that the latter should do so in opposition to their personal interests, must be attributed either to their cander and leve of truth, or to their unwillingness to fly in the face of all observation and the testimo. ny of thousands

Dr. W. Evans does not pretend that his Camomile

One very common objection urged by some win but partially understand the principle of curing diseasely jurg ition as promulgated by the Norn American College of Health, is that atthroughness. American College of ficulty is and only opened erailed purging will cure disease; yet that if e re peaced exercising of those organs will a jure or destroy their tone. I hose wherease objections ap pear to forget that purging is as natural to the low els as walking in to the feet or labor trahe hans, and like every other function must be duly exercis ed in order to retain their energies.

How persons can comprehend the action of reg etable purgatives; by what my sterious processile blood is by the m stimulated to deposite its impur ties into the bowels, or how those organs are excit ed to exhcuste the currupt hamors from the body all can understand when they experience relief-The gentlemen who compose the North American College of Health would therefore earnestly inine all who are suffering from disease of any kind in make a trial of the Indian Vegetable Pills. They beg leave to assure the American Public that sed ladien Pill are a purgative so justly halanced that they may be taken at all times and under aller cumstances with perfect safety, and no dose how ever small, but will bifind some relief, and no quantity, however large, (if it be such as is required

Its power being always directed to the opening of those drains, through which nature carries out all impurities from the body, it affords precasely sha amount of assistance she requires to enable her to cure every variety of disease. It being a very table preparation, and acting in isamensy with our constitution, it is always the right incidence to be administered. A single dose will in most cases afford relief, and if porsevered with, will always effect a cure in most give being the Indian Purgative, (or Indian Vegetable Pills), no cure is necessary, except in taking such is shall operate freely sponethe bowels.
